K

Invites multi and inter-disciplinary articles from various fields that help augment human capabilities
Highlights latest research findings and practical applications of human performance enhancement
Publishes research on the design and development of assistive technology, user interfaces and
Computer Human Interaction

The Journal, Augmented Human Research invites scientific contributions towards augmenting human capabilities through technology for increased well-being and enjoyable human experience. The topics of interest include, but are not limited to:

Augmented Sports and Serious Games

Bionics and Biomechanics

Exoskeletons and Super Human Technologies

Interactions between Augmented Humans and Smart Cities

Brain-Computer Interfaces, Muscle Interfaces and Implanted Interfaces

Wearable Computing and Ubiquitous Computing

Augmented and Mixed Reality

Augmented Fashion, Art and Tourism

Smart Objects, Smart Textiles and IoT Augmenting Humans

Assistive Augmentation, Rehabilitative Interfaces and Games

Alternative or Novel Feedback Modalities

Interfaces, Services and Applications for Human Enhancement

Cognitive Augmentation of the Human Intellect

Augmented Healthcare, Quality of Life & Well-being

Human Sensory Substitution and Fusion

Hardware, Material, Substances and Sensors for Human Augmentation

Safety, Trust, Privacy and Security of Augmented Human Technologies

Ethical and Medical Aspects of Augmented Humanity

Human-Factor Study, Field Study and User Study of Augmented Human Technologies
