IEEE ICBDA2020

We have an unforgettable experience in the spring of 2020, ICBDA suddenly have to move the conference online in light of the social distancing recommendations and global restrictions on travel due to the COVID-19 pandemic. However ICBDA2020 is an unforgettable, grand online remote academic discussion conference.

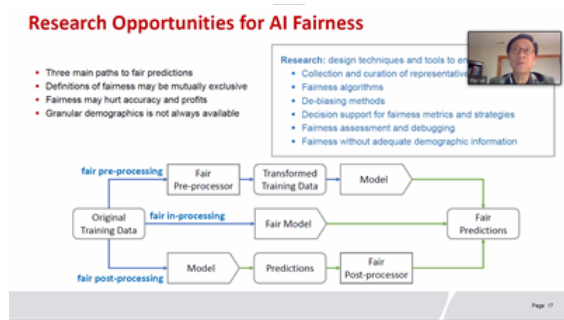

鉴于COVID-19在世界范围内的流行, ICBDA 2020 不得不在在线网络会议的形式召开。但同时, 这也是一场难忘的, 盛大的学术会议。

Opening Remark: Prof. Steven Guan
(Xi'an Jiaotong-Liverpool University, China)
关圣威教授, 西交利物浦大学

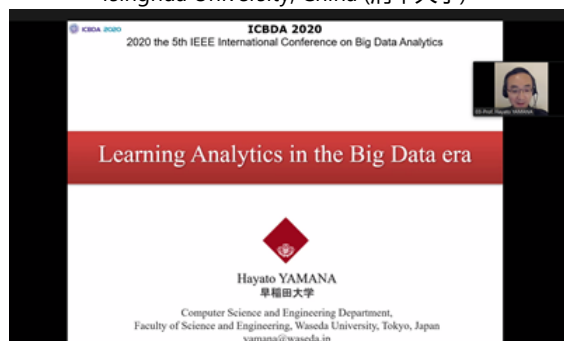

Welcome Address: Prof. Minghui Shi
(Xiamen University, China)
施明辉教授, 厦门大学

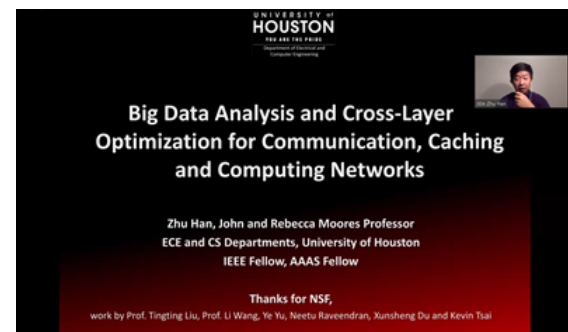

Keynote Speaker: Prof. Hui LEI (雷晖教授) - IEEE Fellow
Futurewei Technologies, USA

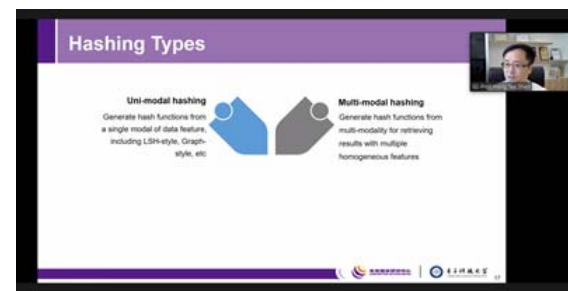

Keynote Speaker: Prof. Guoliang Li (李国良教授)
Tsinghua University, China (清华大学)

Keynote Speaker: Prof. Hayato YAMANA
Waseda University, JAPAN (日本早稻田大学)

Keynote Speaker: Prof. Zhu Han (韩竹教授) - IEEE Fellow
University of Houston, USA

Keynote Speaker: Prof. Heng Tao SHEN (申恒涛教授)
University of Electronic Science and Technology of China, China (电子科技大学)

Invited Speaker: Assoc. Prof. Chutisant Kerdvibulvech
National Institute of Development Administration, Thailand

Excellent Oral Presentation Winners

Session I: Soft Computing

(BAI20-514) Title: Unsupervised Bilingual Sentiment Word Embeddings for Cross-lingual Sentiment Classification

Presenter: **Chunyu Ma**, Beijing University of Posts and Telecommunications(BUPT), China

Session III: Machine Learning

(BAI20-266) Title: An Ensemble Framework for Spam Detection on Social Media Platforms

Presenter: **Junzhang Wang**, New York University, USA

Session V: Data Representation and Data Modeling

(BAI20-233) Title: Evaluation of Hierarchical Structures for Time Series Data

Presenter: **Ruizhe Ma**, Shanghai University of Electric Power, China

Session VII: Intelligent Identification System and Technology

(BAI20-532) Title: RCS-Based Flight Target Recognition using Deep Networks with Convolutional and Bidirectional GRU Layers

Presenter: **Yuxing Peng**, Beijing University of Posts and Telecommunications, China

Session II: Cloud Computing and Smart Computing

(BAI20-243) Title: Privacy Preserving Calculation in Cloud using Fully Homomorphic Encryption with Table Lookup

Presenter: **Ruixiao Li**, Waseda University, Japan

Session IV: Data Analysis and Calculation

(BAI20-504) Title: Food Volume Estimation Based on Reference

Presenter: **Wenjie Sun**, Ocean University of China, China

Session VI: Data Mining and Clustering Algorithms

(BAI20-240) Title: An Ensemble Framework for Spam Detection on Social Media Platforms

Presenter: **Ju Ting Wang**, Tsinghua Berkeley Shenzhen Institution, China

Session VIII: New Generation Neural Network and Algorithm

(BAI20-226) Title: Prediction of short-term stock prices based on EMD-LSTM-CSI neural network method

Presenter: **Yuze Xuan**, Beijing University of Chemical Technology, China
